Summary

Detail-oriented Artificial Intelligence and Data Science graduate with a strong foundation in Python, SQL, machine learning, data analysis, and exploratory data analysis (EDA). Skilled in data cleaning, preprocessing, feature engineering, and data manipulation using Pandas and NumPy, with hands-on experience developing machine learning models and AI applications. Experienced in building Retrieval-Augmented Generation (RAG) systems and recommendation engines, with an understanding of data-driven problem solving and model evaluation. Strong analytical, problem-solving, communication, and documentation skills, with a proactive approach to learning new technologies. Seeking entry-level opportunities in Data Science, Machine Learning, Data Analytics, or Data Engineering.

Technical Skills

Programming Languages: Python

Data Manipulation & Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Feature Engineering

Machine Learning: Scikit-learn, Machine Learning Model Development

Databases: SQL

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Projects

YouTube Video RAG Chatbot

LangChain, FAISS, HuggingFace, Gemini AI

Engineered a Retrieval-Augmented Generation (RAG) pipeline using LangChain, FAISS, HuggingFace Embeddings, and Gemini AI to support context-aware question answering.

Performed data collection and preprocessing of YouTube transcripts, generating vector embeddings and implementing semantic search for accurate information retrieval.

Integrated retrieval and LLM-based generation techniques to deliver reliable, context-relevant responses, improving insight extraction from unstructured data.

Movie Recommendation System

Python, Scikit-learn, Streamlit, TMDb API

Built a content-based machine learning recommendation model using cosine similarity and feature engineering on the TMDb movie dataset.

Conducted exploratory data analysis (EDA) and data cleaning on movie metadata to identify patterns and improve recommendation accuracy.

Developed an interactive Streamlit application integrated with the TMDb API for dynamic data retrieval and presentation.

Certifications

Artificial Intelligence A–Z 2025: Agentic AI, Generative AI, and Reinforcement Learning — Udemy

Oracle Cloud Infrastructure 2025 Certified Data Science Professional

Python with Data Science Course — Pyspiders, Bengaluru, BTM

Education

Bachelor of Engineering (B.E.), Artificial Intelligence & Data Science

KLE College of Engineering & Technology, Chikodi

2026 -- 82%

PUC – Science, Govt. PU College, Majallatti

2022 -- 80.6%

SSLC, S.S.K. Patil English Medium School, Sankeshwar

2020 -- 73%

Interests

Singing | Reading Books
