Summary

Recent AI & Data Science graduate with a good foundation in Python, SQL, Machine Learning, Data Analysis, and EDA. Familiar with data preprocessing, Pandas, NumPy, and basic machine learning concepts, with hands-on experience through academic and personal projects. Eager to learn new technologies, take on different responsibilities, and contribute effectively in an entry-level role.

Technical Skills

Programming Language: Python
Data Analysis: Pandas, NumPy, EDA, Data Cleaning, Data Preprocessing, Feature Engineering
Machine Learning & Deep Learning: Scikit-learn, TensorFlow, CNNs, MobileNetV2, Model Training and Evaluation
Databases: SQL
Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab
Data Visualization: Matplotlib, Seaborn, Power BI

Projects

YouTube Video RAG Chatbot **(LangChain, FAISS, HuggingFace, Gemini AI)**

- Engineered a Retrieval-Augmented Generation (RAG) pipeline using LangChain, FAISS, HuggingFace Embeddings, and Gemini AI to support context-aware question answering.
- Performed data collection and preprocessing of YouTube transcripts, generating vector embeddings and implementing semantic search for accurate information retrieval.
- Integrated retrieval and LLM-based generation techniques to deliver reliable, context-relevant responses, improving insight extraction from unstructured data.

NeuroScan AI — Brain Tumor Detection **(Python, TensorFlow, MobileNetV2, OpenCV, NumPy, Scikit-learn, Streamlit)**

- Developed a deep learning application to classify brain MRI images into four categories: glioma, meningioma, pituitary tumor, and no tumor.
- Implemented transfer learning using MobileNetV2 and a custom classification head, achieving **86.12% test accuracy** on 1,600 test images.
- Built an interactive Streamlit dashboard with MRI image uploads, class-wise probability visualizations, and explainability overlays.
- Performed model evaluation using classification reports, confusion matrices, and dataset integrity checks to assess prediction performance.

Movie Recommendation System **(Python, Scikit-learn, Streamlit, TMDb API)**

- Built a content-based machine learning recommendation model using cosine similarity and feature engineering on the TMDb movie dataset.
- Conducted exploratory data analysis (EDA) and data cleaning on movie metadata to identify patterns and improve recommendation accuracy.
- Developed an interactive Streamlit application integrated with the TMDb API for dynamic data retrieval and presentation.

Certifications

Artificial Intelligence A–Z 2025: Agentic AI, Generative AI, and Reinforcement Learning — Udemy
Oracle Cloud Infrastructure 2025 Certified Data Science Professional
Python with Data Science Course — Pyspiders, Bengaluru, BTM

Education

Bachelor of Engineering (B.E.), Artificial Intelligence & Data Science KLE CET, Chikodi 2026 – **82.00**%
PUC – Science, Govt. PU College, Majallatti 2022 -- **80.60**%
SSLC, S.S.K. Patil English Medium School, Sankeshwar 2020 – **73.00**%
