Summary

Detail-oriented Artificial Intelligence & Data Science graduate with a strong foundation in Python, machine learning, data analysis, and exploratory data analysis (EDA). Skilled in data collection, data cleaning, preprocessing, and feature engineering using Pandas and NumPy, with hands-on experience developing and implementing machine learning models and algorithms. Proven ability to build AI applications, including Retrieval-Augmented Generation (RAG) systems and recommendation engines. Strong analytical skills with attention to detail and accuracy, a proactive attitude toward learning, and effective communication and documentation skills gained through collaborative project work. Seeking an entry-level Associate Data Scientist role to contribute to data-driven projects and machine learning initiatives.

Technical Skills

Programming Languages: Python

Data Manipulation & Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Feature Engineering

Machine Learning: Scikit-learn, Machine Learning Model Development, Algorithm Implementation

Generative AI / NLP: LangChain, RAG (Retrieval-Augmented Generation), HuggingFace Embeddings, FAISS

Data Visualization: Matplotlib, PowerBI

Databases: SQL

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Projects

YouTube Video RAG Chatbot

LangChain, FAISS, HuggingFace, Gemini AI

Engineered a Retrieval-Augmented Generation (RAG) pipeline using LangChain, FAISS, HuggingFace Embeddings, and Gemini AI to support context-aware question answering.

Performed data collection and preprocessing of YouTube transcripts, generating vector embeddings and implementing semantic search for accurate information retrieval.

Integrated retrieval and LLM-based generation techniques to deliver reliable, context-relevant responses, improving insight extraction from unstructured data.

Movie Recommendation System

Python, Scikit-learn, Streamlit, TMDb API

Built a content-based machine learning recommendation model using cosine similarity and feature engineering on the TMDb movie dataset.

Conducted exploratory data analysis (EDA) and data cleaning on movie metadata to identify patterns and improve recommendation accuracy.

Developed and deployed an interactive Streamlit application integrated with the TMDb API for dynamic data retrieval and presentation; documented findings for review.

Certifications

Artificial Intelligence A–Z 2025: Agentic AI, Generative AI, and Reinforcement Learning — Udemy

Oracle Cloud Infrastructure 2025 Certified Data Science Professional

Python with Data Science Course — BTM, Bengaluru (In Progress; Expected Completion: August 2026)

Education

Bachelor of Engineering (B.E.), Artificial Intelligence & Data Science

KLE College of Engineering & Technology, Chikodi

2026 -- 82%

PUC – Science, Govt. PU College, Majallatti

2022 -- 80.6%

SSLC, S.S.K. Patil English Medium School, Sankeshwar

2020 -- 73%

Interests

Singing | Reading Books
